## ABOUT ME

React Frontend Developer with practical experience building responsive and interactive web applications using React and modern JavaScript (ES6+). Skilled in API integration, component-based architecture, and writing clean, maintainable code. Passionate about improving user experience and continuously developing technical skills.

---

## PROJECTS

### Weather App

- Built a responsive weather application using React and JavaScript.
- Integrated external API for real-time data and dynamic updates.
- Implemented user-friendly interface and responsive design for all devices.

### Task Manager App

- Developed a full CRUD application using React hooks (useState, useEffect).
- Managed application state efficiently and built reusable components.
- Designed a clean and modern UI using Tailwind CSS

### Dashboard App

- Built an interactive dashboard displaying charts and statistics.
- Created responsive layout and reusable UI components.
- Focused on performance and user experience.

### Note

All projects include live demos and source code available in my portfolio.

---
